# Energy performance certificate (EPC)

38 Laharna Avenue LARNE BT40 1NG Energy rating

Valid until: 19 July 2032

Certificate number: 9314-0054-7283-4782-0210

Property type

Mid-terrace house

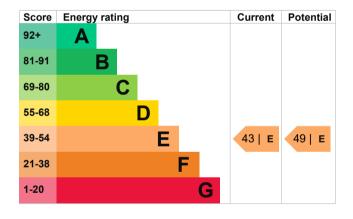

Total floor area

62 square metres

# Energy efficiency rating for this property

This property's current energy rating is E. It has the potential to be E.

<u>See how to improve this property's energy performance.</u>

The graph shows this property's current and potential energy efficiency.

Properties are given a rating from A (most efficient) to G (least efficient).

Properties are also given a score. The higher the number the lower your fuel bills are likely to be.

For properties in Northern Ireland:

the average energy rating is D the average energy score is 60

### Breakdown of property's energy performance

This section shows the energy performance for features of this property. The assessment does not consider the condition of a feature and how well it is working.

Each feature is assessed as one of the following:

- · very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

When the description says "assumed", it means that the feature could not be inspected and an assumption has been made based on the property's age and type.

Feature	Description	Rating
Wall	Solid brick, as built, no insulation (assumed)	Very poor
Roof	Pitched, no insulation (assumed)	Very poor
Window	Partial double glazing	Poor
Main heating	Boiler and radiators, oil	Average
Main heating control	Programmer, TRVs and bypass	Average
Hot water	From main system, no cylinder thermostat	Poor
Lighting	Low energy lighting in all fixed outlets	Very good
Floor	Solid, no insulation (assumed)	N/A
Secondary heating	Room heaters, electric	N/A

#### Primary energy use

The primary energy use for this property per year is 362 kilowatt hours per square metre (kWh/m2).

Environmental impact of this property		This property produces	5.6 tonnes of CO2
This property's current envi	•	This property's potential production	4.8 tonnes of CO2
Properties are rated in a scale from A to G based on how much carbon dioxide (CO2) they produce.		By making the <u>recommended changes</u> , you could reduce this property's CO2 emissions by 0.8 tonnes per year. This will help to protect the environment.	
Properties with an A rating than G rated properties.	produce less CO2	Environmental impact ratin assumptions about average	•
An average household produces	6 tonnes of CO2	energy use. They may not consumed by the people liv	reflect how energy is

### Improve this property's energy performance

By following our step by step recommendations you could reduce this property's energy use and potentially save money.

Carrying out these changes in order will improve the property's energy rating and score from E (43) to E (49).

Step	Typical installation cost	Typical yearly saving
1. Increase hot water cylinder insulation	£15 - £30	£25
2. Draught proofing	£80 - £120	£24
3. Hot water cylinder thermostat	£200 - £400	£17
4. Heating controls (room thermostat)	£350 - £450	£48
5. Floor insulation (solid floor)	£4,000 - £6,000	£22
6. Solar water heating	£4,000 - £6,000	£42
7. Replace single glazed windows with low-E double glazed windows	£3,300 - £6,500	£37
8. Internal or external wall insulation	£4,000 - £14,000	£122
9. Gas condensing boiler	£3,000 - £7,000	£26
10. Solar photovoltaic panels	£3,500 - £5,500	£347

#### Paying for energy improvements

Find energy grants and ways to save energy in your home. (https://www.gov.uk/improve-energy-efficiency)

# Estimated energy use and potential savings

Estimated yearly energy cost for this property

Potential saving £959

The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property.

The potential saving shows how much money you could save if you <u>complete each</u> recommended step in order.

#### Heating use in this property

Heating a property usually makes up the majority of energy costs.

### Potential energy savings by installing insulation

The assessor did not find any opportunities to save energy by installing insulation in this property.

#### Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
